ART UNIT PAPER NUMBER

1772

DATE MAILED: 08/24/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/757,208

Applicant(s)

COBURN, JOSEPH W.

Examiner

Patricia L. Nordmeyer

Art Unit

1772

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 August 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,3-6 and 8-12 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,3-6 and 8-12 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- ☒ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- ☐ Notice of Informal Patent Application (PTO-152)
- ☐ Other: _____

DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Withdrawn Rejections

2. The 35 U.S.C. 102(e) rejection of claims 1, 2, 6 and 8 as anticipated by Bonkowski et al. in the paper dated May 2, 2005 is withdrawn due to Applicant's amendments and explanations in the paper dated August 9, 2005.
3. The 35 U.S.C. 103 rejection of claims 3 – 5, 7 and 9 - 12 over Bonkowski et al. in the paper dated May 2, 2005 is withdrawn due to Applicant's amendments and explanations in the paper dated August 9, 2005.

New Rejections

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 3 - 5 and 8 – 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bonkowski et al. in view of Harelstad et al. (USPN 6,533,961).

Bonkowski et al. disclose a layer of transparent polymeric material having opposed surfaces (Column 4, lines 15 – 16 and 41 – 54; and Figure 1A, #14), one of said opposed surface provided with a plurality of parallel ridges and grooves, said ridges being parallel ridges formed by facets defining a convex surface joined by surfaces forming steps connecting the adjacent facets (Figure 1, #14; Column 4, 25 – 32) with an outer layer of substantially transparent color effect producing material mounted to one of said opposed surfaces (Column 4, lines 17 – 20) wherein said layer of transparent polymeric material and said layer of substantially transparent color effect producing material combining to produce in the presence of light a color effect image such that said layer of transparent polymeric material has an appearance other than that of a surface of said layer of transparent polymeric material and said image being other coincident with said opposed surfaces (Column 4, lines 57 – 59) and a layer of product mounting adhesive applied to the opposed surface of said material to which said layer of substantially transparent color effect producing material is not mounted (Column 9, line 63; Figure 8, #66) as in claim 1. With regards to claim 2, the layer of substantially color effect producing material is a layer of substantially transparent colored polymeric material (Column 7, lines 66 to Column 8, line 2). As in claim 6, the layer of substantially transparent color effect producing material is a layer of substantially transparent iridescent material and wherein said layer of transparent polymeric material and said layer of substantially transparent iridescent material produce in the presence of light a color effect image which is an iridescent color effect image (Column 1, lines 30 – 36). The ridges and grooves are coated with a layer of reflective metallic material (Figure 2B, #18; and Column 5, lines 3 – 14) as in claim 8. However, Bonkowski et al. fail to disclose the outer layer being a single color substantially transparent polymeric material, layer of substantially

Art Unit: 1772

transparent single color polymeric material is mounted to said one of said opposed surfaces by a layer of substantially transparent adhesive, substantially transparent adhesive is a layer of substantially clear single color transparent adhesive, and said layer of substantially transparent single color polymeric material is mounted to said opposed surfaces provided with said plurality of plurality of ridges and grooves by a layer of substantially transparent adhesive.

Harelstad et al. teach an outer layer being a single color substantially transparent polymeric material (Column 5, lines 16 – 18; Figures 1A and 1B, #16; Column 7, lines 45 – 47), the transparent single color polymeric material is mounted to said opposed surfaces provided with said plurality of plurality of ridges and grooves (Figures 1A – 1C, #16) for the purpose of forming an article that has durable pigment that has high visibility (Column 1, lines 10 – 12).

It would have been obvious to one of ordinary skill in the art at the time the applicant's invention was made to have provided a single color transparent material in Bonkowski et al. in order to have an article that has durable pigment that has high visibility as taught by Harelstad et al.

Regarding the use of a substantially transparent adhesive to adhere the layers of the decorative product together in claims 3 – 5, 7 and 9 – 12, Bonkowski et al. discloses the claimed invention except for the use of a substantially transparent adhesive to adhere the layers of the decorative product together. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use an adhesive material to place the layers together in the

Art Unit: 1772

desired order instead of using the method of sputtering or physical vapor deposition (Column 3, lines 65 – 67; Column 5, lines 15 – 17) as disclosed by Bonkowski et al., since it has been held that omission of an element and its function in combination where the remaining elements perform the same functions as before involves only routine skill in the art. *In re Karlson*, 136 USPQ 184.

Response to Arguments

6. Applicant's arguments with respect to claims 1, 3 - 5 and 8 – 12 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia L. Nordmeyer whose telephone number is (571) 272-1496. The examiner can normally be reached on Mon.-Thurs. from 7:00-4:30 & alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Y. Pyon can be reached on (571) 272-1498. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
